DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I in the reply filed on 11 April 2008 is acknowledged.

Claim Objections

Claim 5 is objected to because it includes the trademark "Teflon®." This recitation must be replaced with the appropriate material; i.e., polytetrafluoroethylene. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1-3, 5, 6, 13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prosenz (U.S. Patent 4,376,594) in view of Thompson (U.S. Patent 4,681,302).

As discussed in previous Office actions, Prosenz discloses a plurality of elements having the claimed shape (Figure 5). Prosenz does not teach the material different from that the main portion of the barrier to be surrounding the rod. Thompson discloses a material (40) different from the barrier to be surrounding a connecting rod (42). It would have been obvious to one of

ordinary skill in the art at the time the invention was made to have used the configuration of Thompson with the barrier of Prosenz in order to include a bushing, as taught by Thompson.

The bushing meets the recitations regarding the bore.

The materials are not disclosed by Prosenz in association with the energy absorbing material (8); however, these materials are well known for use in crash barriers. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used polytetrafluoroethylene as a coating on the coupling structure of Prosenz, in order to ease connection and disassembly of adjacent barriers, for example. This meets claim recitations.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Prosenz and Thompson as applied above, and further in view of Smith (U.S. Patent 5,022,781).

Smith teaches a barrier having a cup lined bore (34, Figure 3) for accommodating a rod. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the cup lined bore of Smith with the barrier of Prosenz in order to strengthen the bore and/or easily manufactured the barrier having a bore therein.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Prosenz/Thompson/Smith as applied above, and further in view of Tagg (U.S. Patent 6,837,647).

Tagg discloses optionally interconnecting barriers with a tubular pin having integral anchor members (43). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the pin of Tagg with the barrier of Prosenz in order to obtain a more secure connection, as taught by Tagg.

Response to Arguments

Applicant's arguments filed 16 November 2007 have been considered but are moot in view of the new grounds of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
